

Evaluation checklist

E1

	Judgements made about the processes, including consideration of both the successes and limitations
	Judgements consider the validity, manageability and ethical appropriateness of processes
	Judgements consider alternative processes that could have been undertaken
	Value of processes compared and conclusions drawn about which ones were most successful

E2

	Judgements made about challenges faced during research development
	Judgements made about challenges faced during research development
	Judgements consider significance of decisions made

E3

	Successes and limitations of the research outcome considered
	Successes and limitations of the key findings considered
	Successes and limitations clearly shown as important for the research outcome
	Clear judgements made about the quality of the outcome

S3

	Evaluation is well structured with paragraphing logically sequenced
	Paragraphs begin with a topic sentence which then lead into supportive detail and/or examples
	Ideas are expressed fluently with correct spelling and grammar
