

## Elemental Chemistry

|  | Assignment 1 | Assignment 2 |
|--|--------------|--------------|
| Electron configuration using subshell notation | 1,2          | 1,6          |
| Trends of elements and oxides                  | 3-7          |              |
| Small molecules                                |              | 5            |
| Physical properties of substances              |              | 2-4          |
| Primary and secondary interactions             |              | 3-4, 7       |
| Chemistry explanations                         |              | 2-4, 7       |
